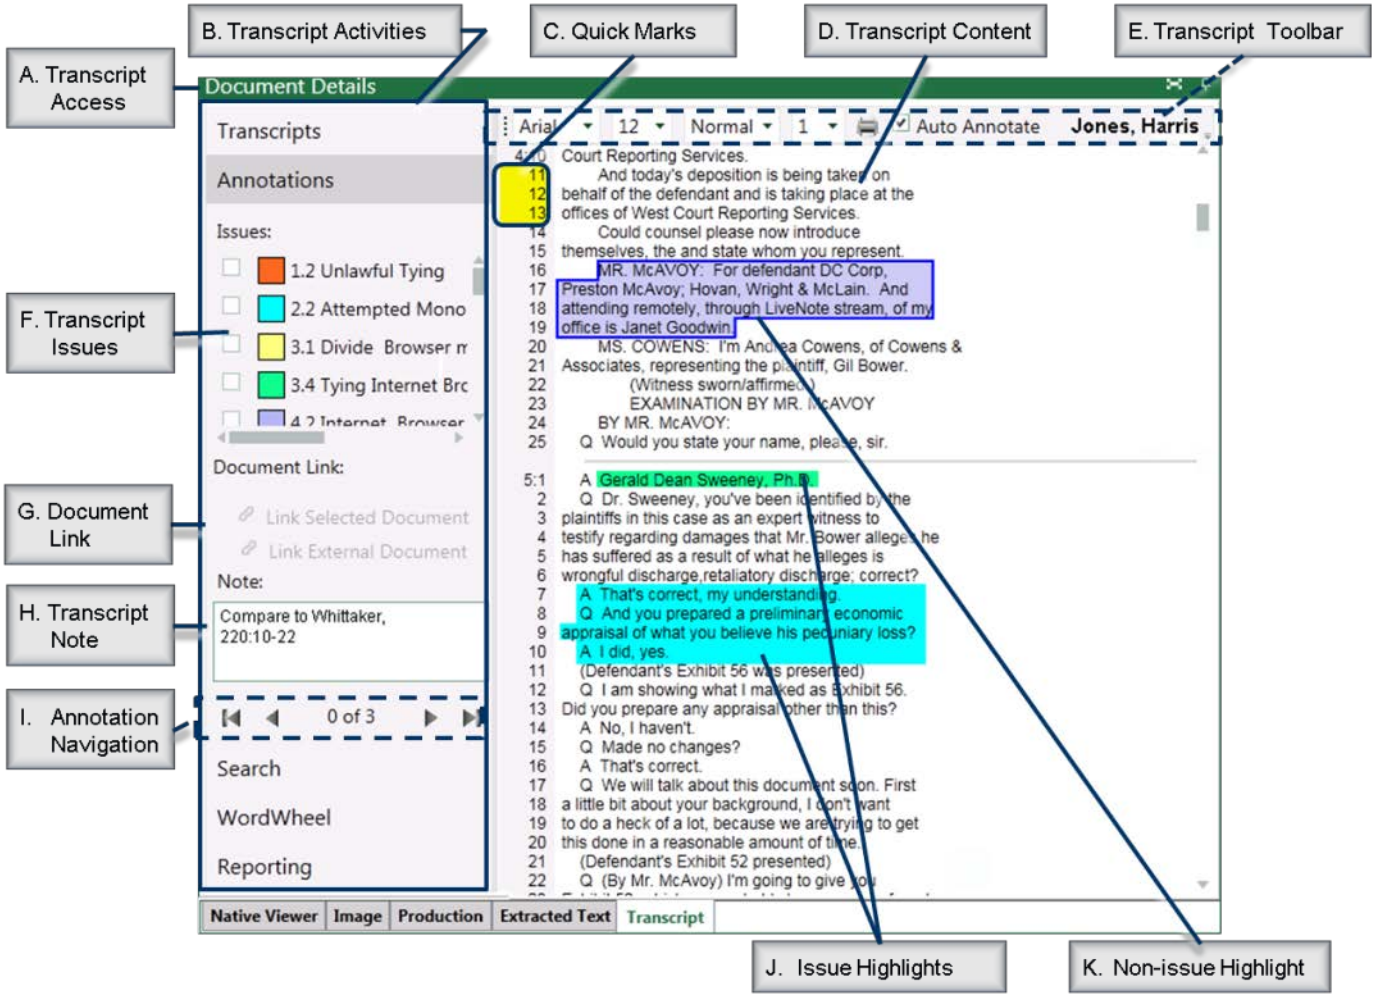
Eclipse® by Ipro 2018.6.1 Transcripts Interface Quick Reference



Eclipse® by Ipro 2018.6.1 Transcripts Interface Quick Reference

Transcript Components

Item		Description
A	Transcript Access	Transcripts are located in the Document Details pane (**Transcripts** tab). To see transcripts, open a case or batch, click **Documents** in the Case View pane, open, pin, and/or undock the Document Details pane, then click the **Transcripts** tab.
B	Transcript Activities	Select different transcript actions and tools. (See next page for details.)
C	Quick Marks	Reviewers can click line numbers to highlight them and create "quick marks" – simple place markers in the margin. In addition to providing visual cues, a report summarizing quick marks can be generated.
D	Transcript Content	A selected transcript's text displays in this window. Drag across needed text and right-click to select it for highlighting, annotating, or copying.
E	Transcript Toolbar	Define transcript appearance; choose other options. F	Transcript Issues	Use to tag transcript content with needed issues. The Ipro Eclipse administrator defines transcript issues for each case.
G	Document Link	Associate a case document or an external file to highlighted text.
H	Transcript Note	Add comments to transcript highlights. Transcript notes can be searched.
I	Annotation Navigation	Navigate through quick marks, highlights, and annotated highlights in the transcript. J	Issue Highlight	Highlight transcript text for further review and to tag it with a specific issue and/or add a note.
K	Non-issue Highlight	Highlight transcript text for further review.

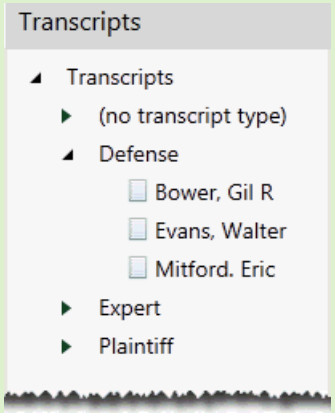
Transcript Activities

Transcripts

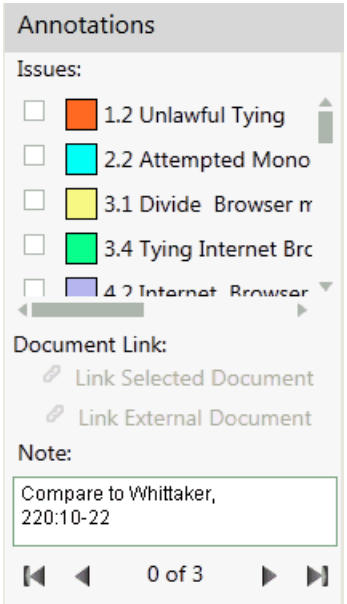
Click **Transcripts** to choose a transcript from list of folders and subfolders (transcript types and subtypes).

Folder organization is defined by the Ipro Eclipse administrator.



Annotations

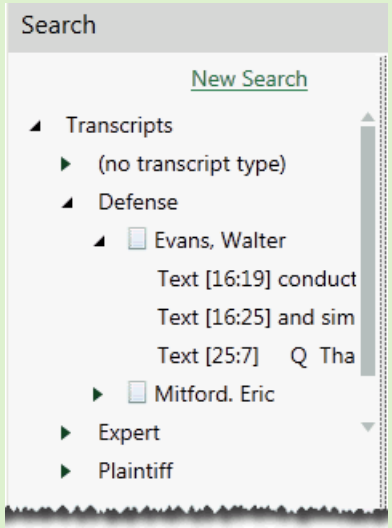
Click **Annotations** to add issues, document links, and/or notes to transcript highlights, or to navigate through all annotations (see previous page for navigation details).



Search

Click **Search** to find specific content in transcripts and/or notes. Click **New Search** to define/run the search.

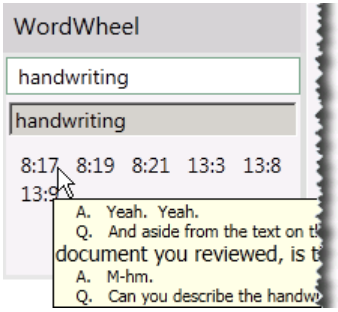
Evaluate search results in the list in the Search pane. Click individual results to see the content in the transcript (or note).



WordWheel

Click **WordWheel** for an index of words and numbers in selected transcript; use to find specific content.

Results are listed by page:line numbers. Tooltips show excerpts of content for each location; click a listed *page:line* to go to the location.



Reporting

Click **Reporting** to generate reports on transcript issues, notes, quick marks, or search results.

Define the report in the Reports pane (shown here); report displays in the right (content) side of the **Transcripts** tab. See the next page for report details.
