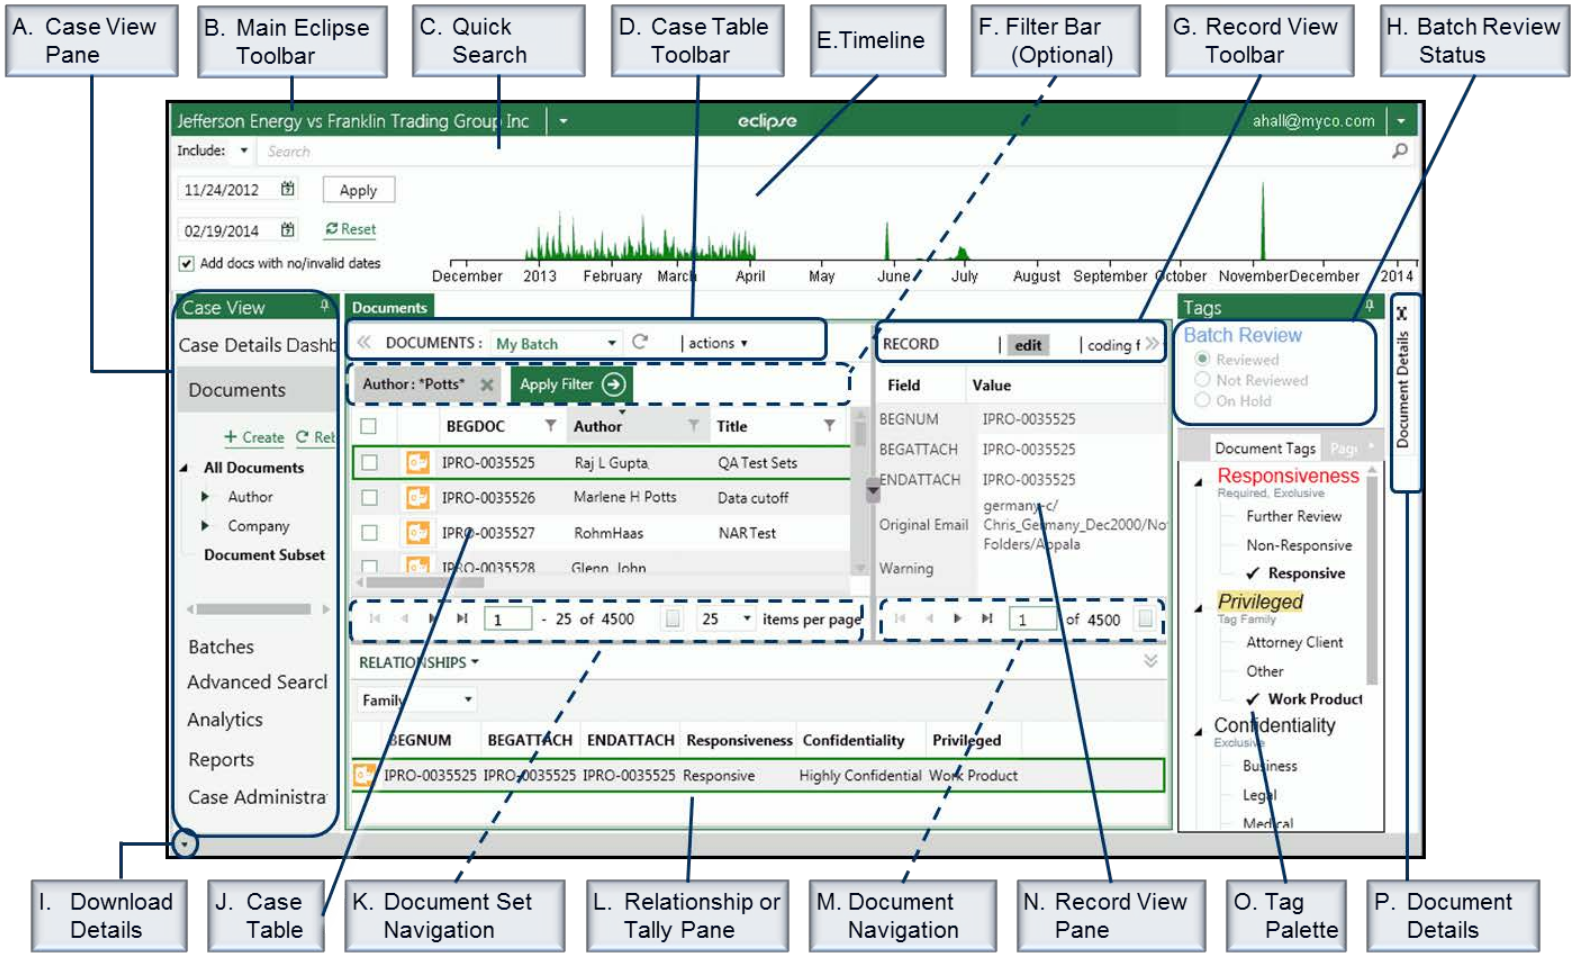
Eclipse® by Ipro 2018.6.1 Review User Interface



Eclipse® by Ipro 2018.6.1 Review User Interface

User Interface Components

Item		Description
A	Case View Pane	Select different sections and aspects of the case. (See table below for details.)
B	Main Ipro Eclipse Toolbar	Left side: case name and menu with **Open Case**, **Administration**, and **Reset Layout** commands. Right side: user name and menu with **About**, and **Sign Out** commands.
C	Quick Search	Perform basic text searches or field-specific searches.
D	Case Table Toolbar (in **Documents** or related tab)	
E	Timeline	Shows dates for the documents in the case or selected set of documents (such as a batch, folder, or search results). The timeline provides a simple way to filter the current document set based on a date range.
F	Filter Bar (Optional)	Filter the case table based on data in one or more columns (that is, field data). This is an alternative to searching on a specific field. The filtering bar appears only if you click for a column(s) and define filtering criteria.
G	Record View Toolbar	Select a coding form to display; control editing and saving of record changes.
H	Batch Review Status	Select status of document under review: reviewed, not reviewed, or on hold.
I	Download Details	View image download information in status bar or click to view download details.
J	Case Table	When case documents, a batch, search results, folder, or analytics item is selected, this area displays a table listing records corresponding to the documents in the selection.
K	Document Set Navigation	Navigate records in case table; define number of records to display; synchronize/ desynchronize documents (records **Document Details** tabs). L	Relationship/Tally Pane	Shows document relationships or tally results.
M	Document Navigation	Navigate through individual documents. N	Record View Pane	View and edit fields in a coding form. Form content is defined by administrator.
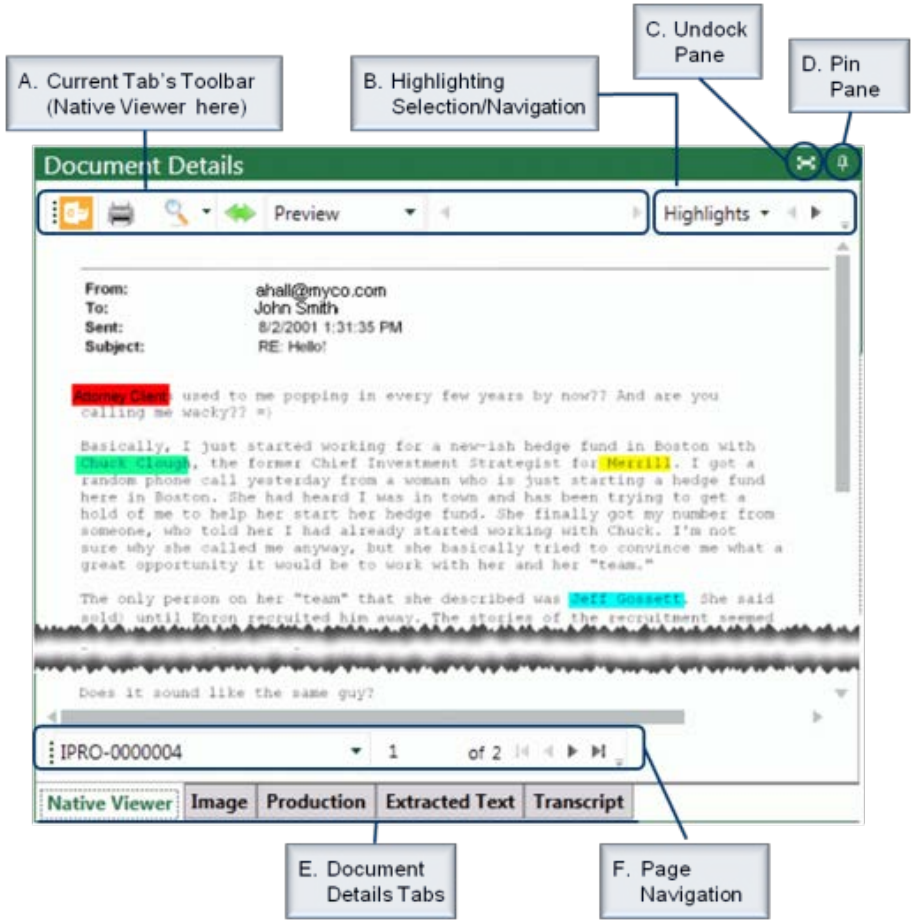
O	Tag Palette	Apply tags to documents or pages.
P	Document Details Pane	Review images, extracted text, native files, production files, or transcripts if are part of case. See next page for details.

Eclipse® by Ipro 2018.6.1 Review User Interface

Case View Pane

Case Details Dashboard	Documents	Batches	Advanced Search	Analytics	Reports	Case Administration
View review status, case instructions, and related documents.	Display case or batch documents; organize them in folders.	Check out/check in individual review batches.	Create advanced searches or access saved searches.	Optional. Display Ipro Eclipse Analytics categories and clusters.	Run and export reports.	For administrators; configure/manage various aspects of the open case.

Document Details Pane



Item		Description
A	Current Toolbar	Tools for working with different document views (see next page for details).
B	Highlight Selection	Navigate and control which highlighting (search results and/or persistent highlighting) displays.
C	Undock Pane	Separate Document Details pane from main application (make it freestanding).
D	Pin Pane	Keep the pane open (or allow it to collapse when not in use).
E	Tabs	Choose a view of the selected document or case-related transcripts: ▪ Native Viewer ▪ Image ▪ Production ▪ Extracted Text ▪ Transcript
F	Page Navigation	Select or navigate individual pages in a document (Image, Production tabs).
