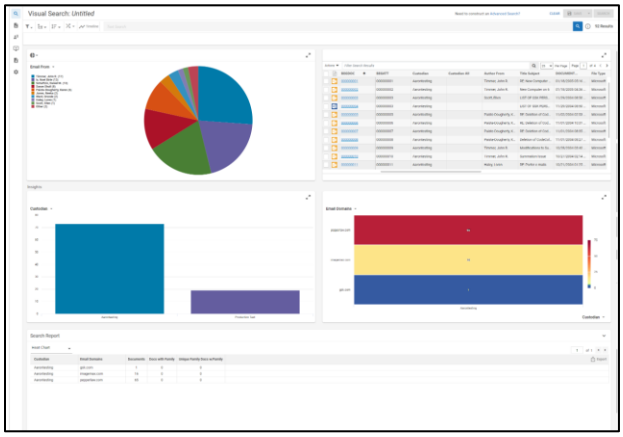
Visual Search Dashboard Interface Overview (1 of 3)

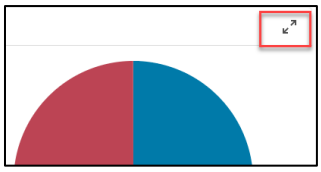
Visual Search Dashboard

Opening your Case

When you open a Review case, it will default to the Visual Search Dashboard.



- The dashboard is a full-screen display of all the Visual Search elements: charts/Concept Wheel, plus the Results grid and the Search Report.
- The full-screen icons allow you to see each dashboard area in full-screen view.



Basics

The basic commands are located at the top of the Visual Search Dashboard window.

- **Link to other modules**

- **Case Name**

Review & Transcripts | Globex - Review

- **Links to:**

Notifications:

Job Manager:

System Settings:

- **Visual Search Title:**

Visual Search: *Untitled*

Untitled indicates cleared search.

- **Link to Advanced Search**

Need to construct an Advanced Search?

After you have built and saved a **Visual Search**, you can run Advanced Search capabilities by editing the search within the **Advanced Search** tab.

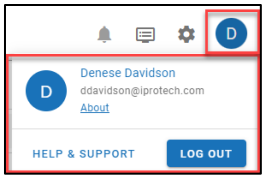
- **Search commands**

Clicking ***Save*** will open the Saved Search window. Click the down arrow to open Save As.

- **Search Results**

159,190 Results

- **User Info and Help**



Search Filters

Search Filters allow you to further refine your search results by selecting one of options in the drop-down menu.

Field Filters

All fields in your database are available for searching.

Relationships

When performing a search requires the use of a search relationship, use the **Relationships** drop-down menu.

Sort Options

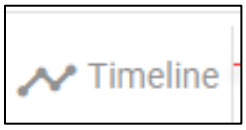
The **Sort Options** drop-down menu contains a list of fields on which to sort the Visual Search.

Random Sampling

Random sampling provides a representative set of documents from the search results.

Timeline

The **Timeline** allows you select date criteria for the search.



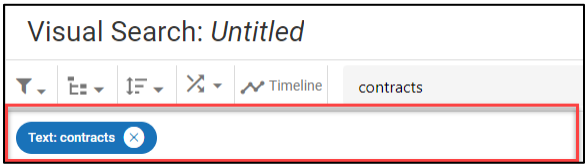
Clicking the Icon expands and hides the Timeline.

Text Search

The Text Search bar is located to the left of the Timeline.

- After entering the search query, click

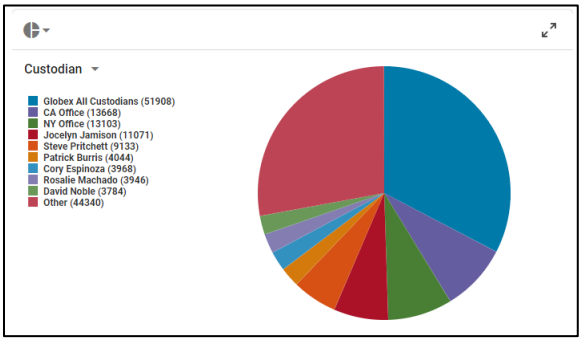
This adds the text to the query line.



- You must click SEARCH to run the search.

Pie Chart

A Pie Chart displays sections with the nine highest counts for any given search along with a tenth count containing all "Other" results.

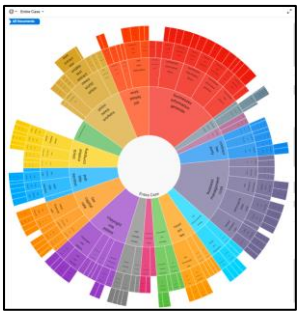


- What the pie sections represent is determined by the filter field you select from the pull-down menu at the top left of the chart.

Concept Wheel

Clicking the icon above the Concept Wheel pull-down menu allows you to choose the Concept Wheel or the Pie Chart.

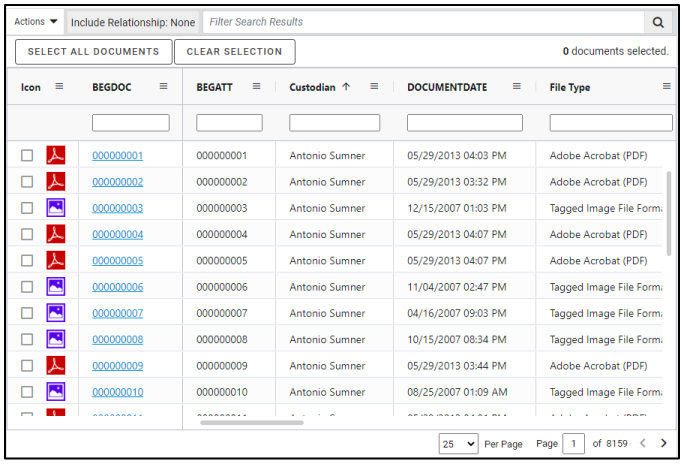
- The concept wheel is a visual representation of cluster details and based on the clusters configured by your administrator.



Visual Search Dashboard Interface Overview (3 of 3)

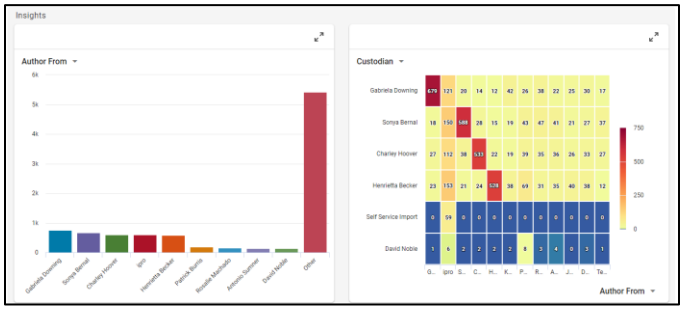
Results Grid

The **Results** grid segment of the dashboard lists all documents meeting your search criteria in a grid format. The column heading fields reflect the fields on the first coding form.



Insights

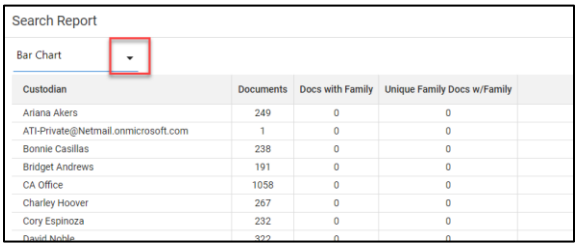
This area of the dashboard contains a Bar Chart and a Heat Map.



- A Bar Chart displays sections with the nine highest counts for any given search along with a tenth count containing all "Other" results.
- A Heat Map shows the correlations between two different fields, along both the X- and Y-axes.

Reports

The Search Report allows you to view the case data that correlates to your visual search parameters. Clicking the down arrows allows you to change between charts.



- The report can be exported to .csv file by clicking the icon on the right.

Administration

The buttons located on the left of the window access additional administrative options. Depending on the individual permissions, the buttons that are viewed may be different.
