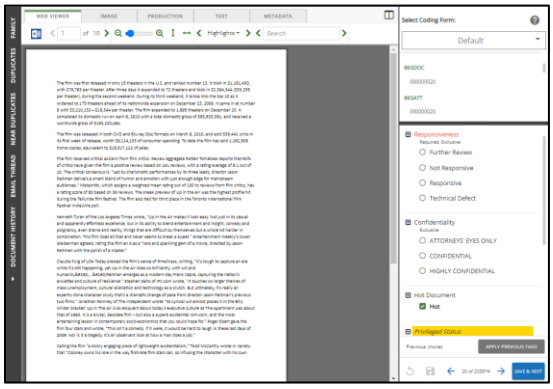
Document Viewer Interface Overview (1 of 4)

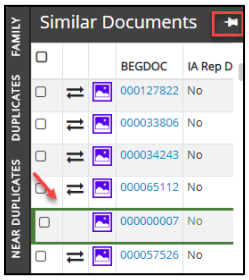
Document Viewer

The Document Viewer displays when you select a document listed in the BEGDOC column of the **Results** tab. Each document view tab has an associated toolbar.



Relationship Pane

The Relationship panels display on the left of the Document Viewer. The panels consist of **Family**, **Duplicates**, **Near Duplicates**, **Email Thread**, **Document History** and **Similar Documents**.



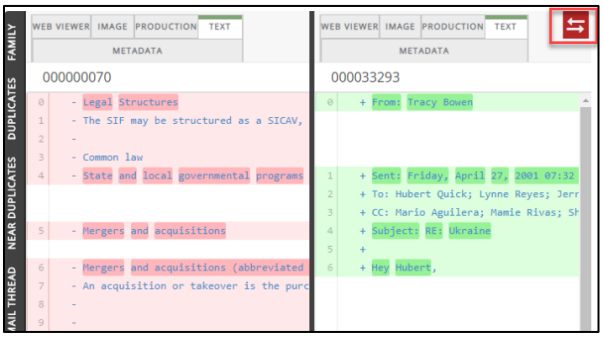
- The relationship pane can be pinned. The document outlined in green indicates which document is selected in the results grid.
- To view the relationship information for the currently displayed document, click the desired relationship tab.

Document Comparison Tool

The Document Comparison tool allows you to compare the document selected in the Results tab to another document that displays in a Relationships panel.

- To compare the document selected in the Results tab with any of the other documents, select the check box next to that document in the panel and click the icon.

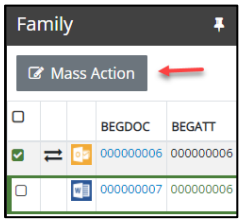
- The two documents then display side-by side in the Document Comparison tool of the Document Viewer. Click the red icon to close the tool.



- In the document on the left (the original document), anything that displays as missing or added is highlighted in red. In the document on the right (the compared document), anything that displays as new is highlighted in green.

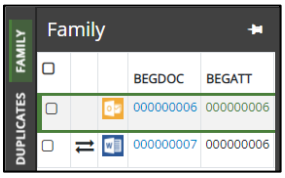
Mass Action

Selecting a document in the Relationship pane will open the **Mass Action** options. You can change coding forms, apply tags and edit fields.



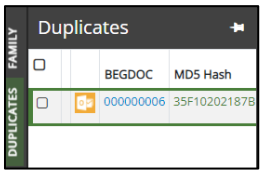
Family

The Family panel displays documents that are related to one another, as in an email and its attachment.



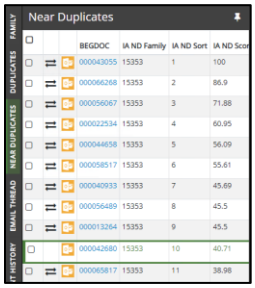
Duplicates

The Duplicate panel displays documents that are the same or nearly the same in content. If any, duplicate versions will be listed.



Near Duplicates

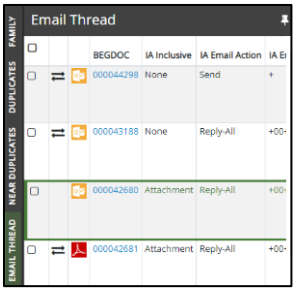
The Near Duplicates panel displays textual near-duplicates in which most of the text displays in other items in the group and in the same order.



The IPRO Analytics function identifies textual near-duplicate groups in item text. The documents are grouped by IA ND Family and sorted by IA ND Sort.

Email Thread

The Email Thread panel displays relationships among a family of emails that share a common starting email. An email thread represents a single branch of an email family.



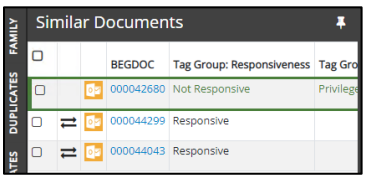
The IPRO Analytics function can identify email families and inclusive emails for email threads. An inclusive email is one that contains all text of all emails and their attachments in the family. The documents are grouped by IA Email Set ID and sorted by IA Email Sort.

Document History

The Document History panel displays a list of actions, such as redactions and tags, that were taken for a current document, sorted chronologically.

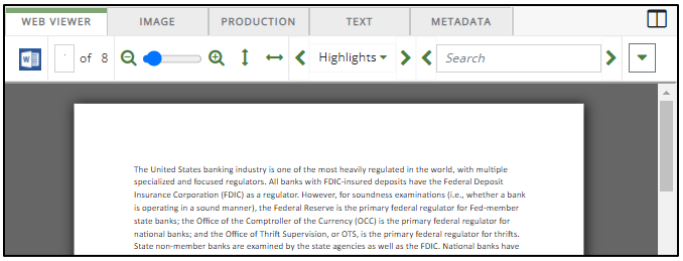
Similar Documents

The Similar Documents panel displays search results for documents deemed similar to the selected document.



Web Viewer

The Web Viewer allows for viewing native files such as emails, spreadsheets, and/or word processing documents

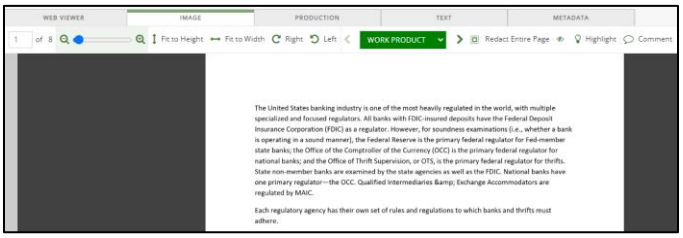


Toolbar Actions:

- Download the Native file.
- 1 of 8 Displays current page and total number of pages.
- Increase or decrease document size.
- Fit to Height / Fit to Width Fit image to the width or height of the view window.
- Highlights Displays persistent highlighting groups menu.
- Search Quick search.
- Image Image document on the fly.

Image Tab

The Image Tab displays the document image where all annotations and redactions are performed.



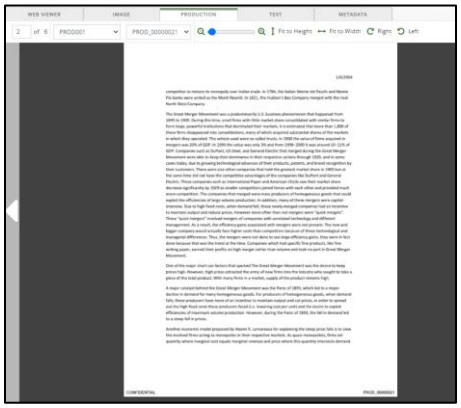
Toolbar Actions:

- 1 of 8 Displays current page and total number of pages.
- Increase or decrease document size.
- Fit to Height / Fit to Width Fit image to the width or height of the view window.

- Right Left Rotate the image in 90 degree increments, either right or left.
- WORK PRODUCT Opens the redaction categories and redaction navigation.
- Redact Entire Page Click to redact the entire page.
- Click to show/hide the redactions in the image.
- Highlight Click to activate the highlighting function.
- Comment Click to add a comment on the image.
- Print Click to print the document.

Production Tab

The Production Tab displays documents exactly as they were produced, with redactions and bates numbering.

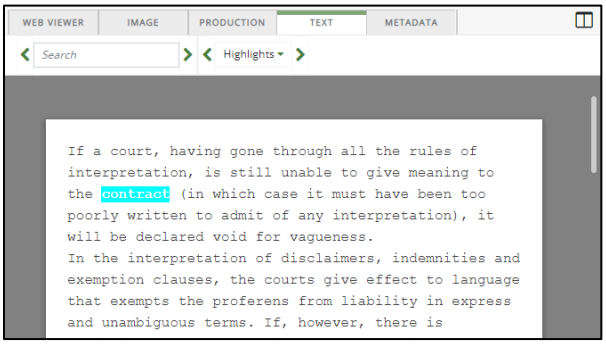


Toolbar Actions:

- 2 of 6 Displays current page and total number of pages.
- PROD001 Shows the production name. Click the arrow to change productions.
- PROD_00000021 Shows the page number. Click the arrow to change pages.
- Increase or decrease document size.
- Fit to Height Fit to Width Fit image to the width or height of the view window.
- Right Left Rotate the image in 90 degree increments, either right or left.

Text Tab

Displays the current document in plain text format. It displays the data in the EXTRACTEDTEXT field.

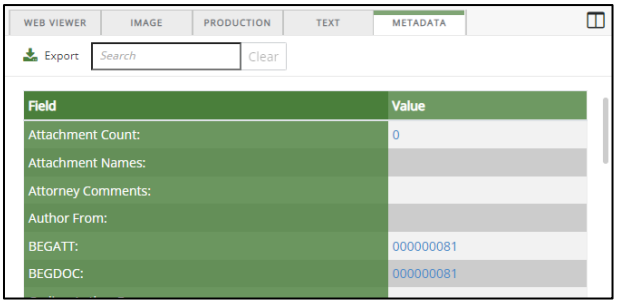


Toolbar Actions:

- Search Quick search.
- Highlights Displays persistent highlighting groups menu.

MetaData Tab

The metadata view displays two columns: Field and Value. Both these columns may be sorted by clicking on the desired column heading.



Toolbar Actions:

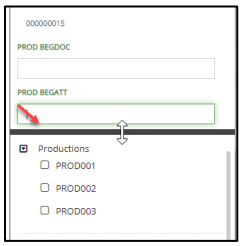
- Export Export data to a .csv file
- Search Search to display only those fields and/or values in the metadata grid.
- Clear Clear the search.

The Viewer Tabs can be viewed side by side by clicking the spilt screen icon.

Document Viewer Interface Overview (4 of 4)

Record View Pane

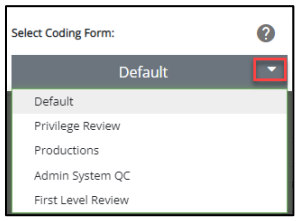
The Record View pane contains the Coding Form pane and the Tag Palette pane and is stationary on the right of the Document Viewer window. The panes can be resized by clicking and dragging the horizontal bar between them.



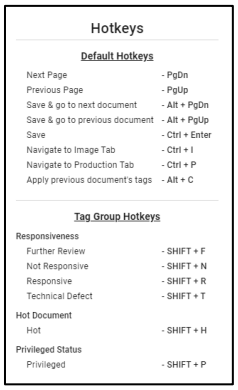
Coding Form Pane

Coding forms dictate which editing fields, tags and rules appear for reviewing documents. The tags that appear are directly related to the coding form that is selected.

- Click the down arrow to change the coding form while reviewing documents.



- Click ? in the upper right corner of the coding form pane to access a list of available Hotkeys for navigation.



Hotkeys

Default Hotkeys
